

# Pentesting automation with **Reconmap**

## Intro for **Pentester Academy**

Santiago Lizardo

September 4, 2021

## About the presenter

- ▶ <https://github.com/santiagolizardo>
- ▶ Cyber security enthusiast
- ▶ +20 years doing software engineering
- ▶ Reconmap's founder

# Reconmap's conception

## Pentesting pain points

- ▶ Repetition
- ▶ Ineffective collaboration
- ▶ Ineffective communication

# Reconmap's mission

Reconmap's mission is to accelerate the time it takes to do vulnerability assessment and pentesting, through the use of templating, automation and machine learning. From weeks to days, or days to hours.

# Reconmap's approach

- ▶ Templates to avoid repetition
- ▶ Automation and ML to speed up the process

## Result:

Pentesters spending more time doing research, and less time doing repetitive, boring, tedious work such as parsing files manually or creating handcrafted pentest reports for their clients.

# Reconmap's Today - September 2021

- ▶ 1 year old
- ▶ Open source and SaaS
- ▶ Small but growing community
- ▶ Used in production by people around the world

# Recomap's feature set

- ▶ Client, project, tasks management all in one.
- ▶ Reusable project and vulnerability templates
- ▶ Automatic pentest report generation (HTML, PDF, DOCX)
- ▶ Command line interface (CLI) and Rest API
- ▶ Can scale to teams and projects of any size.
- ▶ User roles, documents, markdown, audit log, integrated search, tagging, data import/export, ...

# Architecture

# Coming features

- ▶ Complex workflows (reviewers)
- ▶ Independent customer's portal
- ▶ Secret management
- ▶ More integrations

# How to get started?

## Manual setup

Follow [setup instructions](#)

Requires significant time to  
install and maintain  
Community support (chat)

## SaaS

[Affordable hosting](#)

Ready in minutes  
Technical support (phone,  
email, chat)  
Always latest version

# Staying in touch

- ▶ Github community
- ▶ Twitter updates
- ▶ Facebook
- ▶ Gitter chat
